

**KLI0001-100
PATENT APPLICATION**

**Serial No.: 09/801,470
Filed: March 8, 2001**

IN THE SPECIFICATION:

Please replace the paragraph beginning on page 40, lines 5-11 as follows.

Serial sections (5 μ m) from the formalin fixed, paraffin embedded biopsies were placed on glass slides previously coated with a film of 1% poly-d-lysine, 30,000 to 70,000 molecular weight (Sigma), dried for 30 minutes at temperatures no greater than 60 C and stored at room temperature until used. Indirect immunostaining was performed using anti-cyclin E and anti-p27 antibodies. The antibody for cyclin E (clone HE12) and p27 (clone DSC-72.F6) were purified mouse monoclonal antibodies type IgG1, purchased from NeoMarkers (Lab Vision Corp., Fremont, CA (~~www.labvision.com~~)).

Please replace the paragraph beginning on page 50, lines 13-16 as follows.

Hormone replacement therapy is discussed in detail in the monograph entitled Individual Hormone Therapy to Promote Better Health and Quality of Life which is posted on the world wide web, at ~~www.womenandmenopause.com~~ and particular the page ~~www.womenandmenopause.com/Download/CMEMonograph.pdf~~.
